The Performance Grant will support a grant transfer mechanism in the form of a conditional specific purpose grant (SPG) fully integrated within the intergovernmental fiscal framework to Ethiopia's urban local governments. The project will initially support 19 urban local governments, which constitute about 45 percent of the total urban population. If implemented well, it will be sustained through additional funds and expanded to other regions and cities. The planning and budgeting for ULGDP at federal, regional and ULG levels will be integrated into and aligned with the existing GOE Public Investment Program financial calendar and systems. <b>Mozambique, Support to Electoral Planning and Management</b>	\$765,000	<a href="http://www.odamoz.org.mz/reports/rpt_desc.asp?pn=493190">http://www.odamoz.org.mz/reports/rpt_desc.asp?pn=493190</a>	The overall outcome of the project is that national election planning and management performance is improved. This will be done by strengthening the planning, budgeting, organization, and management capacities of the electoral management bodies; strengthening the electoral management bodies-government-donor coordination mechanisms; ensuring, monitoring and evaluating the effectiveness and efficiency of the electoral cycle funding and resource mobilization; and implementing new forms and channels of civic and voter education in the whole electoral cycle 2007-2009. However, given the current uncertainties about the electoral law and timing of the coming provincial elections, the project in 2007 will focus on preparatory data collection, planning, coordination, and resource mobilization. On this basis, UNDP will be ready to support the electoral management bodies once in place and once the electoral law and timing of the coming provincial elections is agreed. OPRCs are designed to increase the efficiency and effectiveness of road asset management and maintenance. They aim to ensure that the physical condition of the roads under contract is adequate for the need of road users, over the entire period of the contract normally several years. OPRCs significantly expand the role of the private sector, from simple execution of works to management and conservation of road assets and; the second component is the institutional strengthening and policy reform. <b>Rwanda, Strengthening Good Governance Program</b>	\$10.26 million	<a href="http://www.undp.org.rw/Governance_Project1.html">http://www.undp.org.rw/Governance_Project1.html</a>	This project aims at strengthening accountability and responsiveness of key state players for delivering the EDPRS objectives. It is also meant to enhance effectiveness and capacities of key national institutions, mandated to promote state accountability and responsiveness". The project is built around a shared agenda between the Government of Rwanda, DFID and UNDP giving weight to the need for good governance – in particular in the development of a responsive and accountable state, a state which enters into a social contract with its citizens, listens to citizens' voice, allows itself to be held accountable for the way in which it develops its policies and delivers its services, and a state which protects and upholds the rights of all. The basic assumption is that good governance is central to the development process, and that it needs state capability, responsiveness and accountability as prerequisites.
